

Dan Drawbaugh Chief Executive Officer

Dan Drawbaugh is Chief Executive Officer of The Steadman Clinic and the Steadman Philippon Research Institute in Vail, Colorado. As CEO, Drawbaugh leads a team of talented physicians, researchers and scientists who make TSC and SPRI one of the most sought after orthopaedic sports medicine destination centers globally where world class medicine and world class research strategically align.

Since becoming CEO in January 2015, Drawbaugh has presided over strategic growth initiatives that are delivering impressive results. Building upon more than two decades of pioneering sports medicine innovation and research, TSC has expanded into a new, state-of-the-art Sports Medicine Clinic. As well, SPRI has built a new, state-of-the-art Research Center comprised of a Regenerative and Translational Medicine Research Lab, Surgical Skills Lab, Biomechanical Lab and Biomotion Lab that operates in partnership with internationally recognized scientists and research institutions. By establishing this new Research Center, SPRI is exponentially expanding the capabilities of its research programs to create valuable and life-changing clinical innovations in sports medicine.

One of the key partnerships Drawbaugh has engineered is an alliance with the University of Texas Health Science Center at Houston. SPRI and UT Health are facilitating landmark research into the growing study of stem cell based technologies and musculoskeletal conditions. Drawbaugh also expanded the organization's partnership with the Vail Valley Medical Center (VVMC) as the two groundbreaking medical facilities entered into a \$100 million, 10-year research partnership to continue to advance Steadman Philippon's global prominence in sports and orthopaedic medicine through investments in research capabilities and new scientific research facilities.

Under Drawbaugh's leadership, TSC continues to expand its acclaimed team of surgeons and physicians, including recent additions such as noted joint replacement specialists Dr. Raymond Kim and Dr. Joel Matta, former New England Patriots team physician Dr. Matthew Provencher and internist and perioperative medicine specialist Dr. David Kuppersmith.

Drawbaugh is a proven leader and innovator in healthcare information technology with over 30 years of experience in the areas of information and biomedical technologies. Drawbaugh joined TSC and SPRI from the University of Pittsburgh Medical Center, where he held the position of Chief Information Officer and other positions for 31 years. He earned a bachelor's degree in biomedical and electrical engineering technology from Temple University and an MBA from Duquesne University.

Using his entrepreneurial know-how, Drawbaugh has cultivated an outstanding track record of building lasting, revenue-generating partnerships. He has served on a number of boards, including the Oracle Advisory Board, IBM Advisory Board and Verizon Wireless Advisory Board.

Other information technology honors to his credit include:

- *InformationWeek500* – UPMC was named No.1 Innovator of the Year in 2013 recognized for its innovations in technologies across all industries.
